MERIDIAN PRODUCTS

NEWS, PRODUCT UPDATES & CURRENT INDUSTRY TRENDS | **SUMMER 2021**

BRING ON THE COLOR!

The spring and summer seasons of 2021 are strengthening the trend toward homeowners wanting cozier, vibrant, and comfortable color selections in their kitchens. The market is showing that more and more architects, dealers, and homeowners are specifying these colors as the predominant color of their project and not just as a small accent piece as in the past. Samples of these color are available through our CSR or Sales team members.

ARCTIC

TURQUOISE

AQUA

BABY BLUE

SKYLAR

HUNTER

SAGE

KEY LIME

OLIVE

MINT

Photographs and renderings in this brochure are for illustration and reference only.

Actual wood and finish colors may vary due to printing process. Meridian Products always recommends ordering a sample door and/or drawer sample for accurate color selection and representation.

HOMESTEAD COLLECTION

The **Frontier Series**, which is part of the Homestead collection, is Meridian Products' line of 3DL (Thermofoil) doors, drawer fronts, moldings, and accessories. Our material is 100% recycled, CARB II compliant, medium density fiber board (MDF). We use a water-based glue to apply our 3DL colors using a membrane-press to adhere the 3DL to the component parts.

2021 PRODUCT MANUAL

The 2021 Product Manual is now available in paperback, flash drive, or email. Please contact your CSR or sales team member.

TEAM SPOTLIGHT

GET TO KNOW THE TEAM BEHIND MERIDIAN PRODUCTS

My name is **Trevor Enck** and I am the ERP Director and Order Entry Team Leader at Meridian Products. I have been working at Meridian since 2008. After working for almost six years in the office at a woodworking

competitor, I was asked to consider joining the Meridian team. I came on board as a Customer Service Rep, working with customers and their orders on a daily basis. A few years into my employment, I added the role of Special Product Pricing Coordinator. This job involved working directly with shop managers and engineers to determine pricing on our custom products.

In Spring 2016, I transitioned from Customer Service to the Team Leader of the Order Entry department. I maintained the role of SPP Coordinator as well. As Team Leader, I manage the workflow of incoming orders, contribute to the typing and proofing of customer orders,

train new team members, and look for ways to improve the efficiency and production of our team.

The Meridian Products executive and management teams began to realize our internal computer system would eventually no longer be supported and would need to be replaced. I was asked to participate as part of a search team to find the right vendor for a new ERP system. After several years of research and discussions, we chose a path forward as a company. I was then offered the position of ERP Director. I am currently leading the project of developing our fully-integrated system that will manage all aspects of business at Meridian Products. I still serve as OE Team Leader in addition to my new role.

I am proud to be a member of the Meridian team, and I greatly appreciate the supportive nature of the executive team. Our employees are valued as people, not just workers, and there are many opportunities for personal and professional development.

I live in Manheim, PA with my wife Christina and our four children, Kaleigh (13), Arolyn (11), Colbie (11) and Aidan (4). I am a Lay Leader and Liturgist at Salem United Methodist Church, where I am also a member of the softball team. I am a big fan of the Chicago Cubs and Chicago Bears, and I enjoy fishing, yard work, and watching my kids participate in their activities.

BARNWOOD DESIGN

Since introducing our Barnwood species in 2018, we have had an incredibly positive response to our man-made offering that looks and feels like old and weathered barn material. Customers who have had the chance to use this material convey how much the natural wood has enhanced and enriched their space.

MDRF DOORS

Year after year, Meridian Products' MDRF line of products has shown to be the choice of many of our high-end kitchen manufacturers for their painting needs. Our material quality and design options, like chiseled corners and back routs, with an attractive price point helps us offer a product that we feel will meet or exceed your customers' expectations. When using this product, solid wood expansion and contraction, framing joint cracks, and visible stave lines are eliminated from your long list of painting challenges.
