

EXPLORING THE NATURAL BEAUTY
AROUND US, IN COLOR & DESIGN.

Seasoned Grain Relief – a textured appearance that enhances the wood’s natural beauty. See page 14.3 of our manual for details.

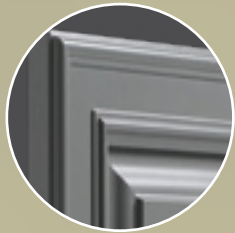

MERIDIAN PRODUCTS

MDRF MITER COLLECTION

Meridian Products MDRF Miter Collection was designed to be structurally superior to painted, solid wood miter products. MDRF doors (when painted) are more stable and resist contraction and expansion better than solid wood.

Colors from pictures may vary slightly from the actual wood due to the translation and reproduction limitations of photography. Since wood is a product of natural growth, no two pieces of wood will look exactly alike. Meridian Products recommends purchasing a sample door or color chip for clients to review.

Bring the beauty of the natural world into your home with our new, nature-inspired collection. These all-new colors are an homage to the wonders of nature that surround us.

Snow Drift

Fossil Gray

Graphite

Sky

Smoke

Onyx

Pecan

Terra

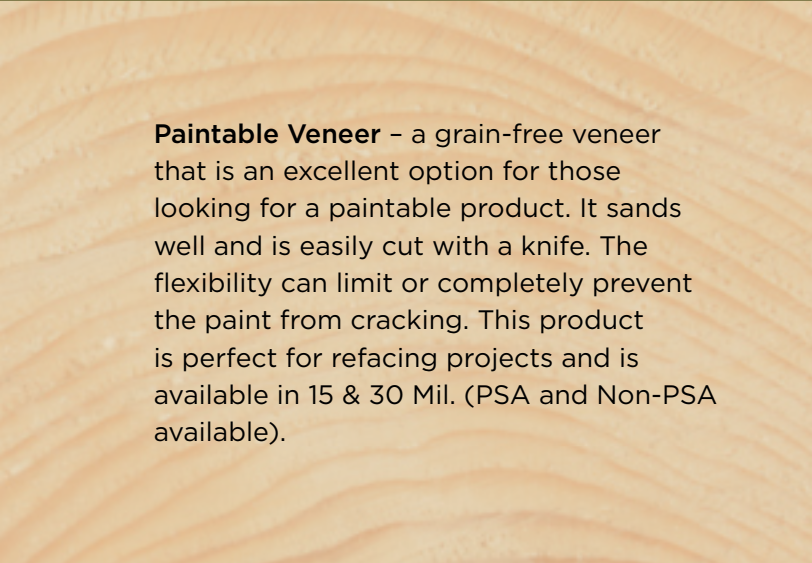

Fog

Acorn

Paintable Veneer – a grain-free veneer that is an excellent option for those looking for a paintable product. It sands well and is easily cut with a knife. The flexibility can limit or completely prevent the paint from cracking. This product is perfect for refacing projects and is available in 15 & 30 Mil. (PSA and Non-PSA available).

New Knotty Specification & Level 3 Distressing – our new material selection allows for more natural character on our knotty specifications. It shows heartier knots, open knots, more color variations and character. Shown with our new Level 3 distressing.
